Comments: Every Community have concerns about the Environment, Historical Properties, Natural Resources and so forth. On top of these concerns, majority of us here on the Island of Tinian in the Marianas, never come to realize the impact of noise Pollution during a Military Training or Exercise. None of us here can avoid these noise in the event of Military Training Operations especially Jets flying over the commute location of the Island. O k; Is there a least alternative to minimize these noise during Aerial Training Operations?

Visit www.MarianasRangeComplexEIS.com for project information. Please Turn →

*Provide your mailing address to receive future notices about the Mariana Islands Range Complex EIS/OEIS.

Aside from this matter, I like to include the safety of Commercial Airlines that's flying between the Islands of Tinian and Saipan. If the noise pollution and air safety hasn't been realized or not included in the Scope of Environmental study, I urge the Department and Personnel to take this into consideration as well. THANK YOU.

And for my request, I like to ask if I can obtain a copy on copies regarding the Scope of studies that may impact us here on Tinian?
